

Extraction Tool IC

Features

- RND have developed this U type extractor as an alternative for removal/pull as a convenient and professional tool for students and professionals to have to hand
- The u shaped tool has a Stainless Steel (201) main body which is covered with PVC to give good insulating when handling
- Excellent for extracting IC and their installation
- Excellent choice for repair to 8 and 24 pins as it helps to not bend the pins for technicians or IC works
